SIDS = Vaccination Death

SIDS is 100% death from vaccination....saying otherwise is the equivalent of wearing a sign that says, "I have no critical thinking skills whatsoever."

SIDS is an invention of the medical field, which literally means Sudden Infant Death Syndrome. The study of SIDS cases reveals these deaths are clustered in and around vaccination times. The medical system declares that although it doesn't know what causes SIDS, it's sure it ISN'T the

vaccines. Make sense? Of course it doesn't. All this of course happening while each vaccine insert lists death or conditions associated with death as side effects. So just to recap the logic. The cause of SIDS is unknown but they know it's not the vaccine, even though the vaccine insert admits death can result. Awakening can be painful but it's better than the alternative. Thinking won't cost you a thing....repeating the lies you've been fed might cost you everything.

OK, now revisit SIDS, which happens to occur predominately around vaccination. Now we know the US has the highest day of birth infant mortality in the industrial world. After day of birth SIDS decreases until the largest spike and most frequent occurrences happen at 2,4, and 6 months of the infants life. Hmm....what events happen at 2,4, and 6 months?? Think harder....

The peak age for SIDS is 2,4, and 6 months, which coincides with the introduction of "wellness checks", which are an invented ritual where you allow your newborn to be injected with a few dozen toxic as holy hell vaccines. The US currently sits 58th in infant mortality...but it's anything but the vaccines Right?

A 2011 study published in Human & Experimental Toxicology, for instance, observed that "The US childhood immunization schedule specifies 26 vaccine doses for infants aged less than 1 year—the most in the world...yet 33 nations have lower IMRs [infant mortality rates]." They found that across the 34 nations analyzed "a high statistically significant correlation between increasing number of vaccine doses and increasing infant mortality rates."

<http://journals.sagepub.com/doi/abs/10.1177/0960327111407644>

Also, a recent study published in Vaccine titled, "Co-administration of live measles and yellow fever vaccines and inactivated pentavalent vaccines is associated with increased mortality compared with measles and yellow fever vaccines only" found multiple infant vaccines dramatically increased the risk of mortality in a trial conducted in the West African country of Guinea-Bissau.

<https://www.ncbi.nlm.nih.gov/pubmed/24325827#>

Another study found, "The case fatality was increased for children who had received DTP with or after measles vaccine compared with children who had received measles vaccine as the most recent vaccine" <https://www.ncbi.nlm.nih.gov/pubmed/17092614#>

A new study published in Current Medicine and Chemistry titled, "Sudden infant death following hexavalent vaccination: a neuropathologic study," lends support for the long theorized link between an ever-expanding number of infant vaccines and Sudden Infant Death Syndrome (SIDS).

<http://www.eurekaselect.com/115921/article>

Given the number of 'antigenic' exposures in vaccines, singularly, and in multi-dose form, the number of possible immunological reactions in newborns is simply mind-blowing especially considering just how little we know about the immune system, the developing brain and infant physiology.

The fact is vaccines have never been statistically proven to work in a single study using an inert placebo as a control, which every single other drug or medicine has to do.

The fact is that vaccines have never been proven to any scientific standard to actually affect infection rates of a populace.

The fact is that vaccines have been proven, over and over again to, as the CDC itself now must admit, "be unavoidably unsafe".

The fact is that, the CDC itself now has to admit that, as they put it, vaccines don't cause autism, but they cause a response that causes autism.

The fact is that every vaccines own inserts will tell you that vaccines absolutely cause death, maiming, and various other types of permanent brain, vascular, neurological, muscular, and other damage.
